SELECTION OF PHYSICIAN TESTIMONIALS

Dr. Adnan Alghadban, MD; Clinical Neurophysiology

Dr. Alghadban is board certified in Neurology and Clinical Neurophysiology.

"The BioBack has proven to be a safe and very effective modality of treatment with patients presenting with lower back pain. We have successfully treated in excess of 300 patients with the BioBack. I recommend this product without hesitation."

Dr. Anthony Paolucci, D.C., NBCE

Dr. Paolucci is a Chiropractor with 30 plus years of experience. His training and education include Pre-Med studies at State University of New York at Buffalo and a Doctorate from the National College of Chiropractic, as well as a Diplomat of the National Board of Chiropractic Examiners.

"The mechanical genius of the 'BioBack' is only outdone by its dramatic simplicity. My patients AND myself love this thing because it can be worn with normal to strenuous daily activity while easily protecting spinal damage and deficiencies - acute or chronic. It just flat out works!"

Dr. Thomas P. Pelino, MD (Retired, dually board certified in both Geriatrics and Internal Medicine).

Dr. Pelino has recommended BioBack for his patients and has used it personally for years.

"I received my new BioBack, thank you...immediate relief. My low back usually tightens after golfing or working around the house. I will get relief within a short time after wearing my BioBack. I've recommended BioBack to many friends and patients."

Dr. Gary Estadt, DC DACRB (Past Chairman of the Board – OSCA)

"After learning about BioBack, I decided to try it on my toughest patient...ME. I injured my lower back and was in severe pain. But the BioBack allowed me to continue to treat my patients and I was still able to go on a planned ski vacation. I've continued to recommend it for my patients with ongoing success."

SELECTION OF PHYSICIAN TESTIMONIALS (continued)

Christopher M. Cole, Licensed Board Certified Podiatrist

Owner, Foot Solutions – Estero, FL

"We have been using BioBack for the past several years with amazing results. The product is simple, and effective, providing immediate relief to so many of our clients with back issues. It has even helped with certain foot issues associated with low back pain. From a business perspective the customer service is amazing. The BioBack lets us stand out from other retail/medical facilities by providing a unique "Lumbar orthotic" that is effective."

Timothy D. Cantwell, Certified Podiatric Orthotics

"What I like best about the BioBack is that when I call my patients to follow up, they are still using the BioBack to live a more active life. In the past, with many other braces, when I called to follow up I would find out that the brace was just sitting in a closet. Our patients really appreciate the BioBack and we are seeing better outcomes."

Dr. Kate Rufolo, DC; (former) President, Congress of Chiropractic State Associations

"The COCSA Seal of Approval is granted to products or services deemed to have exceptional value to our state association members or the chiropractic profession. On behalf of the Board, let me say that the BioBack represents the best of what is out there to improve the profession and to benefit our patients."

Dr. Joseph Angelini, DC, Sports Physician

"The low back...has to carry all of the weight and stresses of the upper body. The main thing that make the BioBack different from other kinds of braces is the opposing forces technology, which puts pressure on both the abdomen and the lumbar area of the patient. Our treatments last longer when the BioBack is used as a support of care."

SELECTION OF PHYSICIAN TESTIMONIALS (continued)

Dr. Eric R. Carlson, DMD, MD, FACS

Professor, Chairman & Residency Prog. Dir. Department of Oral & Maxillofacial Surgery

"I wear my BioBack during surgery underneath my sterile operating room gown, in which cases I rarely, if ever, feel any pain during the case or after. I've recommended the BioBack to many colleagues, many of whom are surgeons, who have used it with equal success."

Dr. Selvin Nanan, M.D. – Family Physician (Semi Retired)

"It (BioBack) is safe to use, it's not expensive and as a few of my colleagues have attested to, patients have done extremely well with it, so we know it's an efficacious modality of treatment for an acute low back problem."

Dr. Ron Ramnath, M.D. Family Physician (Semi Retired)

General Surgeon, Family Physician, Member of American Academy of Family Physicians

"Certainly, I'm not a proponent of using medications for every ache and pain and if I can prevent or control someone's discomfort by any other means besides drugs I would certainly use it. I have found that one way of doing this is by using the BioBack."

Dr. Katherine O'Flynn M.D. - Pediatrician

"One of the things that women experience, and I know about it personally after having had a baby, there's a lot of back strain that you suffer during pregnancy and during the delivery and now you have the new situation of not only having suffered this back strain, but having to do things with your back that you've not previously had to do. Picking up babies and equipment and consequently they have a lot of back pain. BioBack would be perfect!"

SELECTION OF PATIENT TESTIMONIALS

Heidi B. (Florida)

"BioBack gives me great support in my abdominals and also my lower back and lumbar section and whether I'm doing the high impact or the low impact yoga, or even a step class, it gives me the support I need and my body mechanics feel right in sync and I feel great during the whole class."

Clyde W. (Maryland)

"I enjoy my BioBack because it is light, flexible and can be worn under my clothing. It is also very comfortable."

Ruby I. (California)

"First of all, thank you for inventing the BioBack. It works miracles on me. My lower back pain started in 1997. I tried different kinds of pain crèmes, acupuncture, herbal remedies, steroid shots, but it would never go away. After I tried the BioBack...my life changed. I can do anything and everything around the house without pain with my BioBack. It's wonderful. Thanks."

Bill H. (Ohio)

"What a great product BioBack is!!! As a former Division 1 college athlete, I remain very active and exercise almost daily. I am also an avid fly fisherman. Over the last couple of years, I have started to develop lower back strain and muscle discomfort during and after my exercise routines, especially after long power walks. Lower back fatigue after several hours of fishing had also started to cut my fishing days short. Now that I regularly wear the BioBack, my exercise routines and fishing days are truly enjoyable again. I've also started wearing it during routine yard work as well. IT WORKS!"

Ellen J.

"When I wake up in the morning I always have back pain, but as soon as I put on my BioBack I am just fine. I can stand up longer. BioBack stays firm in place. I am so thankful that my dear daughter Susan found the BioBack for me."

SELECTION OF PATIENT TESTIMONIALS (continued)

Don R. (Ohio)

"I am 86 years old, a professional American Saddlebred horse trainer, and have been riding horses my entire life. Until about a year ago, my health has been excellent, but I began having problems with my back and it became uncomfortable to continue riding horses. I thought my career was over. However, I began wearing the BioBack, particularly when riding. The results have been incredible and it has given me a new lease on life. I was able to get back in the saddle and ride without the pain I had been experiencing."

Delores S. (Pennsylvania)

"Upon receiving (the BioBack) I did laugh. With the horrific pain (I had), how was this simple thing going to help in the slightest. Wow, what an experience. It's as if you are dreaming. The relief was no laughing matter, it was a miracle. (Before) I couldn't get out of bed because the pain I had in my back and leg, I hope no one ever goes through it. Walking was not something I was able to do – to go any distance was not an option. My back has three bulging discs, stenosis and sciatica. Doctors all stated they could do nothing for me, only medicate. This brace did it all. So just give it a try and you'll only be sorry you didn't try it sooner."

James S.

"Fantastic Product. Have had periodic lower back problems for 50 years. BioBack has FINALLY given me immediate pain relief. I can now work with the BioBack on and not worry about injuring my back."

Mary W. (Ohio)

"This brace is the holy grail of braces...It works, instantly there is relief!! I've had problems since 2004 and now I have the relief I need to be more active. Thank you BioBack – a little miracle for a big problem...and no medication needed!"

William H. (New Jersey)

"I wore my BioBack on vacation to Florida and accidentally left it there. I returned to New Jersey and was lost without it. I've never had a back brace that worked so good! Thank you for your product!"

SELECTION OF PATIENT TESTIMONIALS (continued)

Karen S. (Minnesota)

"I am a strong supporter of your product after my husband started using it three years ago. He does 10-14 hour days lifting cases of soda. He is 52 years old and before BioBack he would come home with back pain, to the point he was stumbling to walk across the kitchen.

Someone contacted me at my old position at Target in the Risk Management department about introducing BioBack there for work place safety. While our safety department did not have interest, I had interest personally. After I left Target you provided my husband with a BioBack and it has been a "back saver" for him.

Joseph B. (Florida)

"I am 83 years old and have so many back issues you can hardly believe it. Stenosis, degenerative disc disease, as well as many other problems and had 3 surgeries that didn't work. Over the last 45 years, I have tried many back solutions, but this is the only one that works. Any time I am driving or taking part in an activity, I always have it on. You get support in just the right place and I heartily recommend it."

Vicki R. (Ohio)

"I went to therapy, used prescribed medication, and had two back injections. None of them worked. BioBack's relief has been great...I have my life back."

J.K. (Illinois)

"The BioBack is excellent. I am a Chicago police officer, also a high school basketball coach. I have recommended the product to all of my friends with ailing backs. Thanks You!"

Nancy K. (New Mexico) – Age 70

"I'm now able to walk a couple of miles while wearing the BioBack."

SELECTION OF PATIENT TESTIMONIALS (continued)

John B. (Ohio)

When I first tried the BioBack, I could tell the difference right away. Almost immediately I felt relief in my lower back and I could bend over and not feel any pain. I use it any time I'm doing any activity at all. I'd recommend the BioBack to anyone, it's light and comfortable and it relieves back pain. It's made for that and that's exactly what it does."

Patricia H.

"I have had 5 back surgeries and take morphine and other strong medications that just don't help with the pain levels anymore. I've had trouble walking or standing for any length of time and my quality of life was miserable. With the Bio-Back I can stand and walk and I was able to travel for three hours to visit with family members for the first time in years."

Richard M (Pennsylvania)

"The BioBack is very comfortable, it is easy to use and fits nicely. Works much better than others I have used."

Steve S. (Ohio)

"Thanks to BioBack, I don't have to quit my job!" I'm a corrections officer and have been wearing BioBack for several months. The results have been very good. I have not lost any additional time from work, and haven't experienced any re-aggravations. The small, compact size of BioBack allows me to wear it underneath my uniform without anyone else knowing, which is great because my job prevents me from wearing a support that is visible. I've worn low back supports in the past that have not been effective."

John H. (South Carolina)

"Most comfortable back support I have had."

P.F. (Washington)

"BioBack is a God Send"

SELECTION OF PATIENT TESTIMONIALS (continued)

Bronwyn A. (Ohio)

"After having had two kids within the past two years and having to sit at a desk all day, I was having a lot of problems with my posture and back and was just sore all the time. A friend gave me the BioBack and I fell in love with it. I use it whenever I start to feel achy, or like I need the extra support for my posture or when I know I'm going to be sitting at my desk for eight hours straight."

Larry W. (Arizona)

"Best back brace I've ever owned and I have owned many. Light, strong and comfortable."

Ronald W. (Indiana)

"This back brace is the best I ever wore. Comfortable and relieves pain. I would highly recommend!"

Terry J. (Utah)

"After two years of suffering from movement in my lower back and having 9 shots, I thought I would give the Bio-Back a try. It has been great to stabilize my lower back and reduce pain down my left leg. I would recommend you give it a try."

Susan L. (Ohio)

"Following a severe car accident in 1976, I was left with chronic arachnoiditis, bilateral sciatica, and a progressive neurological movement disorder. Following multiple surgeries and a multitude of different trial medications, I was placed in a lumbosacral corset which I found to be hot, cumbersome, and something I truly hated having to wear. Fortunately, I was introduced to the BioBack years ago and have been a fan ever since. The sleek, light design makes the BioBack comfortable to wear, yet unbelievably strong in supporting my damaged lower back 24/7, even while I sleep. It lessens the spasms in my face, jaw and neck and makes it easier to breathe. The sciatica is lessened as well. I cannot give a higher endorsement for a product since the BioBack has truly made a miraculous difference in my life."

SELECTION OF PATIENT TESTIMONIALS (continued)

Jane W. (Beaconsfield, Bucks, United Kingdom)

"I have had amazing results using your BioBack lumbar Orthosis, after having worn it every day for the past two weeks. I have suffered from Scoliosis, curvature of the spine, and as a result I have had in total six back surgeries, so inflammation has been a continuous issue for me, limiting me in my activities because of pain. I am amazed at how easy it is to wear. I have found the extra support to my muscles, weakened from scar tissue, has given me so much benefit from the usual muscle fatigue and pain I used to experience. I am 52 and have found that over exercise has triggered sciatica and I was just recovering from this when I received the BioBack. Your brace has enabled my back to heal and I am amazed at how much more endurance and stamina I have in performing daily activities. I'm so glad I discovered your product."

Kevin P. (Ohio)

"I use the BioBack every day during pretty much all my normal activities. Sometimes by the end of the day I would feel fatigue in my lower back. But the BioBack gets my posture right and helps me get through the day without that fatigue."

Bill D. (Ohio)

"I was working in the yard one spring morning and a neighbor saw me hunched over in pain and he said, I've got something I think you might want to try. He went and got the BioBack and showed me how to put it on, it was really easy and I put it on and it was like my muscles weren't sore anymore. My back didn't hurt and I continued on for a few hours more doing the yard work I originally planned. I was just, well I think it's an overused word, but I really was amazed."

Bill R. (Ohio)

"I've had back pain for a long time, it's been a nagging problem for about 30 years. I have tried a number of other braces and back supports, but none of them were really satisfactory. I've got a terrible problem with slouching and what I like about the BioBack is that It really makes me feel like standing up straight. It's so light and easy to wear under clothes, it's just the least cumbersome back brace I've ever had. I would definitely recommend the BioBack, there's finally a back brace that should fit and help everyone."
